NINTENDO GAMECUBE CONTROLLER

Playing games is the most fun when you don't have to think about your controller. THE NINTENDO DIFFERENCE

Nintendo believes that making games look beautiful is a constant challenge—but making games fun is an art. That's why at Nintendo, games come before game systems. Nintendo's games start with a vision of something fun, then mold themselves to the technology of the times. The visions have grown bigger and better...and the Nintendo GameCube was created to realize those visions.

The Nintendo GameCube is a huge technological leap, streamlined for easy development and home to the games that will set the standard for the next generation. And despite its raw power and impressive specs, the Nintendo GameCube is a reminder of one important fact—that Nintendo is all about fun.
